DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 66-79 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Specifically, the claiming of structures being in contact with or implanted within the body amounts to an inferential recitation of the body, which renders these claims non-statutory. See "encircles the natural heart" in line 3.

Terminal Disclaimer

The terminal disclaimer filed on 1/24/03 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patents No. 6,077,214 and 6,165,119 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Interference

Applicant's intent to file a Request for Interference is noted.

The BPAI has declared that all applications yet to have an interference declared therein, need to be in compliance with the rule changes effective 9/13/04.

As such, Applicant needs to submit said request before an interference can be declared by the BPAI.

See Federal Register/ Vol. 69, No. 155/ Thursday, August 12, 2004/ Rules and Regulations. As an aside, Applicant should pay particular attention to 37 CFR 41.202 (4) in order to be fully compliant.

Allowable Subject Matter

Claims 15-65 are allowable and 66-79 would be allowable if amended to overcome the 35 UC 101 issue.
